

# Infection prevention and control (IPC)

Committed to you, your team and your practice

**VENUE** @ your practice

**INCLUDES** handouts and certificates of attendance  
4 clinical CPD hours

**COVERS** AS/NZS 5369:2023

**FORMAT** 4 hours education, or  
1 hour observation plus 3 hours education

Our Infection Prevention and Control (IPC) Program continues to evolve and integrates nationally recognised requirements for standard and transmission-based precautions.

This ensures all IPC activities remain aligned with current good practice and supports your practice accreditation training requirements.

Benefits of delivering this program in your practice:

- Be guided through IPC concepts using your equipment and instruments in demonstrations
- Participate in safe open discussions
- Learn practical tips to reduce risk, increase efficiency and reduce cost associated with consumable use, loss and damage to equipment
- Eliminate travel down time
- Conclude with everyone having heard the same message.

## You will learn about:

- Regulatory requirements, guidance documents and standards
- Standard and transmission-based precautions:
  - \* PPE, hand hygiene, sharps and waste
  - \* respiratory hygiene, cough etiquette and physical distancing
  - \* aseptic technique
  - \* DU waterline management
- Working safely and efficiently – staff health and occupational exposure management
- Reprocessing reusable devices:
  - \* cleaning
  - \* role of detergents, ultrasonic cleaners & washer disinfectors
  - \* the importance of rinsing
  - \* batch control tracking
  - \* sterilisation – releasing loads, documentation and recalls
  - \* validation.
- Sustainable control of documents and records.
